

## TLIF0006 Administer a fatigue risk management system

<b>Unit of Competency Description</b>	
<p>This unit of competency involves the skills and knowledge required for road transport schedulers or supervisors/managers to administer a fatigue risk management system within the Transport and Logistics industry.</p> <p>It includes identifying and managing risks associated with fatigue during heavy vehicle driving, operating within a fatigue risk management system, planning trips and updating records, and developing and implementing policies, procedures and strategies to minimise fatigue in the workplace.</p> <p>Work is performed under limited supervision generally within a team environment.</p> <p>Legislative and regulatory requirements are applicable to this unit. The primary legislative requirement of this unit of competency is the Heavy Vehicle National Law (HVNL).</p> <p>Being awarded this unit of competency is a necessary requirement to obtaining National Heavy Vehicle Regulator (NHVR) Fatigue Management Accreditation but is only one of the criteria. Prospective applicants should check with the NHVR before undertaking training and/or assessment.</p>
